Experience

Creative Front-End Developer, 2017 - present

Freelance (Upwork & other platforms) | Tbilisi, Georgia

I've worked on contract projects for different clients, from solo devs to big teams, digital agencies, and design studios. On the Upwork platform alone, I've completed 170+ jobs with an average success rate of 5.0/5.0 (public reviews available). The areas where I have the most extensive experience:

- Graphic programming
- 2D and 3D animations: scroll-driven transitions, animated logos, interactive maps, infographics, product customisers, VR experiences
- Motion design and storytelling
- Data visualizations
- Regular front-end tasks

My profile has been featured as the "Best SVG Freelancer to Hire," "Best WebGL Freelancer to Hire," and "Top Rated Plus." I've tackled all sorts of tasks in these projects, covering a wide range of skills.

Field Application Engineer / Product Manager, 2012-2017

EFO Ltd | St. Petersburg, Russia

- Embedded software development: C & assembly language, low-power MCUs, various sensors, graphics controllers
- Product presentation and marketing

Education

- MEng in Automation and Embedded Electronics, St. Petersburg Polytechnic University, 2012-2014
- BSc in Computer Science, St. Petersburg Polytechnic University, 2008-2012
